(a) Tilt and depth
Activity everywhere: cos τ
Passive wall band: cos τ
cos τ (1 = head into the bulk)
Depth (cells, dotted)
Time relative to departure (t.u.)
(b) Inward flow (away from the wall)
Activity everywhere: at the defect
Ring 4–8 cells
Passive wall band: at the defect
Ring 4–8 cells
Inward flow (cells/t.u.)
Time relative to departure (t.u.)
(c) Defect motion vs own jet
Activity everywhere: defect
Own-jet estimate (0.32·cos τ)
Passive wall band: defect
Own-jet estimate (0.35·cos τ)
Inward velocity (cells/t.u.)
Time relative to departure (t.u.)
(d) Local wall flow, along the circulation
Activity everywhere: escape site
Control site
Passive wall band: escape site
Control site
Wall flow (cells/t.u.)
Time relative to departure (t.u.)
