Own jet of +1/2 defects vs depth and tilt (38565 samples)
(a) Jet strength (along the head)
Jet along the head (cells/t.u.)
Depth (cells from the wall)
cos τ -1.0...-0.6
cos τ -0.6...-0.2
cos τ -0.2...+0.2
cos τ +0.2...+0.6
cos τ +0.6...+1.0
(b) Jet towards the cavity centre
Inward jet (cells/t.u.)
Depth (cells from the wall)
(c) Wall blocks the normal component
Ratio
Normal component transmitted, g
Jet strength / bulk value
Depth (cells from the wall)
