(a) Along the wall normal, for (b)
2.5 towards bulk
Core
2.5 towards wall
Wall
Perpendicular to the head, for (c, d)
Bulk-side lobe
Head
Wall-side lobe
Wall
(b) Vorticity, > 0 co-rotating with the cavity
Vorticity ω (1/t.u.)
Escaper depth (cells)
Time relative to departure (t.u.)
At the core
2.5 cells towards the wall
2.5 cells towards the bulk
Escaper
Control
Escaper depth (right axis)
(c) Lobes relative to a free +1/2 (Ω0 = 0.12/t.u.)
Lobe vorticity / Ω0
Free +1/2
Time relative to departure (t.u.)
Wall-side lobe
Bulk-side lobe
Escaper
Control
(d) All +1/2 by depth
Lobe vorticity / Ω0
Core ω (1/t.u.)
Depth (cells from the wall)
Wall-side lobe / Ω0
Bulk-side lobe / Ω0
Core ω (right axis)
