(a) First harmonic ($A_1 < 0$: pull towards τ = 0)
A_1 per wall defect (k_BT)
Wall-defect spacing (cells)
Bulk pair45, h 0.35, core 1.5
Bulk pair45, h 0.5, core 2.5
Bulk point, h 0.35, core 1.5
Bulk point, h 0.5, core 2.5
Bulk rand, h 0.5, core 1.5
(b) Second harmonic (needed for a finite tilt): not robust
A_2 per wall defect (k_BT)
Wall-defect spacing (cells)
(c) Director across the wall band (MPCD, R 31.8)
Leslie angle θ_L
Director angle from the tangent (deg)
Depth below the wall (cells)
k = 3
k = 6
k = 10
k = 14
k = 20
