
(a) Circle, measured layer (10 wall +1/2)
100
80
60
40
20
0
V (k_BT)
(b) Ellipse 2, idealised full layer (10)
(c) Ellipse 2, measured layer (7 wall +1/2)
0
200
Potential of one bulk +1/2 from the layer, V (k_BT; square-root scale, contours every 20)
(d) Circle: measured $-\ln \rho_+$
(e) Ellipse 2: measured $-\ln \rho_+$
−2
0
2
Potential of mean force $-\ln(\rho_+/\langle\rho_+\rangle)$ (k_BT_{eff})
(f) Leftover field: how well the layer shields
Inside 0.6 level
Inside 0.8 level
Range of the layer's field (k_BT)
10^2
10^1
circle ideal
circle measured
ellipse 2 ideal
ellipse 2 measured
